

The Beauty of Window Dressings ©

Window Dressings come in a wide variety of type and cover a multitude of purposes:

- **Light-filtering**
- **UV protection**
- **Privacy**
- **Darkness**
- **Insulation & warmth**

.....not to mention the beautiful ambiance they can create in a room. They provide the icing on the cake; the finishing touch to any interior.

Multi Layered Window Coverings

The best solution can often be a multi layered one. Think sunscreen roller blinds at the rear to create privacy as well as light and UV filtering. Add to this a second block out roller blind to close out the dark and keep the warmth in at night.

OR, maybe add a pair of gorgeous lined curtains or a fabric roman blind instead of the block out roller blind for a more opulent, elegant look.

Lined Curtains

In a gorgeous fabric, Lined Curtains can then be added on a second track or rod to create warmth and complete privacy at night. Add a Blockout Roller Blind at the rear for the same all important blackout for sleeping or you may need a Sunscreen Roller Blind for daytime UV protection and/or privacy.

Single Blockout Roller Blinds

These are very popular and a cost effective window covering solution. Utilise them anywhere in the home where you need, privacy and darkness. Many also come with thermal backings to help with heat retention. Fabrics range from plain pale neutrals and soft colours through to gorgeous textures and deep shades such as charcoal, black and subtle greys with linen like weaves.

Kids Rooms

For children's bedrooms, roller blinds also come in a range of bright fun prints to create a playful mood.

Venetians

Timber, PVC aka Eco or Fauxwood, or Aluminium Venetian Blinds are an excellent “one stop shop” window treatment solution. Tilted up or down for light filtering and privacy, or closed in the evening for shutting out the night.

Above all, allow time and budget to cover your windows with the best option to suit your requirementsYou and your home will thank you for it!!
