

Aluminium Venetian Blinds

Kiwiblinds Aluminium Venetians are your answer to a practical and cost effective solution for your window dressings. Both the 25mm or 50mm slat width options are fully adjustable to get the desired light or privacy levels in any room or office.

Available in a wide variety of modern decorative colours, the slats are coated in a lead free oven with baked polyester enamel paint applied over a chemical pre-treatment. This optimises scratch resistance and provided superior corrosion protection. Powder coated and robust head and bottom rails provide the foundation for quality and support.

Giving a smart appearance to add finesse, Kiwiblinds Aluminium Venetian's protect against harsh sunlight and heat, while winter warmth is retained overnight. For simplicity of design and function, this could be the answer for you.

Features and Benefits

- 25mm or 50mm width slats options at 0.21mm in thickness
- Head Rail: Robust top quality steel - 28mm in depth x 20mm in width
- Maximum width under warranty: 3000mm (25mm width slats) and 3500mm (50mm width slats)
