

Creation Wood (PVC) Venetian Blinds

A polystyrene based slat system with a standard 50mm slat width. 63mm wider slats are available in some colours at an added price. Polystyrene based slat products are time proven to have amongst the best performance in New Zealand conditions, including thermal stability. They are suitable for use in all areas of the home or office, especially bathrooms and kitchens where they are extremely resistance towards moisture.

Features and Benefits

- 50mm or 63mm slat width options
- 3mm strong slat thickness
- Colour coordinated fascia trim board, allowing complete coverage of head rail for a nice completion
- Maximum width: 2700mm
- Minimum width: 250mm
- Maximum drop: 3000mm up to 1500mm width, then drops incrementally to 2700mm due to weight
- Easy to clean, lift and angle
- Left or right hand control options
- 180 degrees slat tilt capability
- Full product and accessory colour co-ordination
- Smooth easy and quite operation
- Slat tilting battery motorisation options apply
- Five year quality assured product warranty
- Complete technical backup and easy to follow instruction guide for self-installers

Cleaning and Care

- Remove dust from blinds with vacuum cleaner or compressed air
- Clean with damp cloth
- Do not scrub, or use solvents or any abrasive substances to avoid damaging slat coating
- Avoid lifting larger blinds due to weight. Guidelines and warranty terms provided around certain sizes

Extreme Heat Limitations

Although a high quality product, any plastic slat hardware can have some limitations in extreme conditions. Installing into windows that receive full sun in extreme temperatures conditions above this PVC product's rated limit of 60 degrees Celsius (very unlikely in N.Z!) may cause permanent damage.
